

THIS IS  
**CONSQUARE**

A dimly lit room with a television on the wall and a table with stools in the foreground. The scene is bathed in a blue light, creating a moody atmosphere. The text is overlaid on the left side of the image.

# WE WANT YOU TO KNOW WHO WE ARE

Whether the undertaken project is an office, hospitality or commercial space, it initiates a new creative challenge for our organisation. We embark in a thorough search for the harmonious balance between aesthetics and functionality while respecting the architecture of the space and the culture of each organisation. This process is the core element of our identity.

Our meraki [(may-rah-kee): doing something with soul, creativity and love] about traditional furniture craftsmanship, is complemented by our endless search for contemporary and innovative design. Our drive is to create beautiful, yet functional spaces that improve the wellbeing of people who live and work in them.

We use every stimulus as a source of inspiration, we collaborate with some of the most refined brands, we choose high quality and certified materials, we never stop innovating and improving.

Our neoclassical office, located in the heart of Athens, is a living proof of our Hellenic heritage. Working in a space that connects tradition with international novelty, not only fills us with pride but it also constantly fuels our body and mind.

## THE **CON SQUARE** MANIFESTO

1

### **YOUR VISION BECOMES OUR VISION**

The heart of your vision is our top priority. It is the guide that leads us to the best options for all your stakeholders and it embodies your ideals.

2

### **TRANSPARENCY AND GREAT COMMUNICATION**

Our team endeavours to create processes that allow you to observe action as it plays out in real time. This creates a seamless flow of information and provides ample opportunity to spot obstacles and deal with them efficiently as they become apparent. Through emphasis on communication, we guarantee faster problem solving and thus, improve the experience of the project process.

3

### **GOOD DESIGN IS WHERE FORM MEETS FUNCTION**

We want to offer you solutions and products that not only improve your productivity, but they also please your senses. Each piece should be tactile and satisfy the physical, emotional and functional experience, embodying our clients' culture.

4

### **CHALLENGES ARE OPPORTUNITIES**

When we discover a challenge, we use the opportunity to explore it creatively and stretch our imaginations and outline solutions that serve your needs. We use your vision, your values and the community you serve to inspire great problem solving and create innovative solutions.

5

### **BUILDING TOMORROW TODAY**

What we decide today, becomes our reality tomorrow. A space that reflects the soul of your organisation will ensure team morale and productivity into the future. Your office furniture cannot change the world, but the people that use it can.

WE STARTED OUR JOURNEY AS AN  
**INDEPENDENT**  
CONSULTANT & FURNISHING  
PROVIDER...AND WE  
REMAIN ONE TO THIS DAY

We foster openness and we like making partnerships. Driven by a desire to do things better, our everyday goal is to bring quality to each project and provide our clients with functional and value for money solutions.

We want to constantly challenge ourselves, we want to explore, we want to create, we want to do things better.

**Not for the sake of it, but because we want to create genuine value for our clients.**

ORGANISATION

**PROJECT ROADMAP**

\*A&D=ARCHITECTS & DESIGNERS

WITH AN APPRECIATION OF  
**QUALITY AND SIMPLICITY,**  
WE TAKE STEPS TOWARDS  
A FUTURE IMPRINTED WITH  
**CARE AND CONSIDERATION**

We take steps towards a future imprinted with care and consideration, and we pick our partners and our suppliers after an in-depth analysis of their corporate social responsibility activities.

We collaborate with brands who share the same values with us and are constantly trying to minimise their carbon footprint, by incorporating environmentally friendly manufacturing processes, maximising the use of recycled components, selecting materials from sustainable sources, utilising materials and components that can be easily recycled, optimising the amount of materials used, and design products that are easy to maintain and have an increased lifespan both in terms of functionality and aesthetics

**We are not doing all this so we can praise ourselves and use fancy green certificates. We are doing all this because it is our obligation to provide a better world for the future generations.**
